

## CLAIMS

What is claimed:

- 5      1. A device that enables a user to view contents of a virtual desktop sent to said device as a raster image of the virtual desktop.
- 10     2. A device that enables a user to view contents of a virtual Web browser sent to said device as a raster image of the virtual Web browser.
- 15     3. A translator software resident on a host computer that takes a virtual desktop and translates it to a raster image and sends it to a remote location.
- 20     4. A translator software resident on a host computer that takes a virtual Web browser and translates it to a raster image and sends it to a remote location.
- 25     5. A device as claimed in Claim 1, such that it allows the user to click on any point in the image;  
              the device sends a message to a host;  
              the host sends back a refreshed raster image.
- 30     6. A device as claimed in Claim 1, such that it allows the user to double-click on any point in the image;  
              the device sends a message to a host;  
              the host sends back a refreshed raster image.
- 35     7. A device as claimed in Claim 1, such that it allows the user to drag and drop on any point in the image;  
              the device sends a message to a host;  
              the host sends back a refreshed raster image.
- 40     8. A device as claimed in Claim 1, such that;  
              it allows the user to click on a point on the image;  
              it sends a message to a host;  
              if the click event is in a location where the user could type text, the host sends a message back to the device to prompt the user to enter text.
